PROJECT REPORT: DIGITAL LITERACY

SUBMITTED BY: SHALINI PAL

REG NO. 25BHI10018

BRANCH: CSE HEALTH INFORMATICS

TASK 1: CREATE A DIGITAL LITERACY AWARENESS INFOGRPHIC

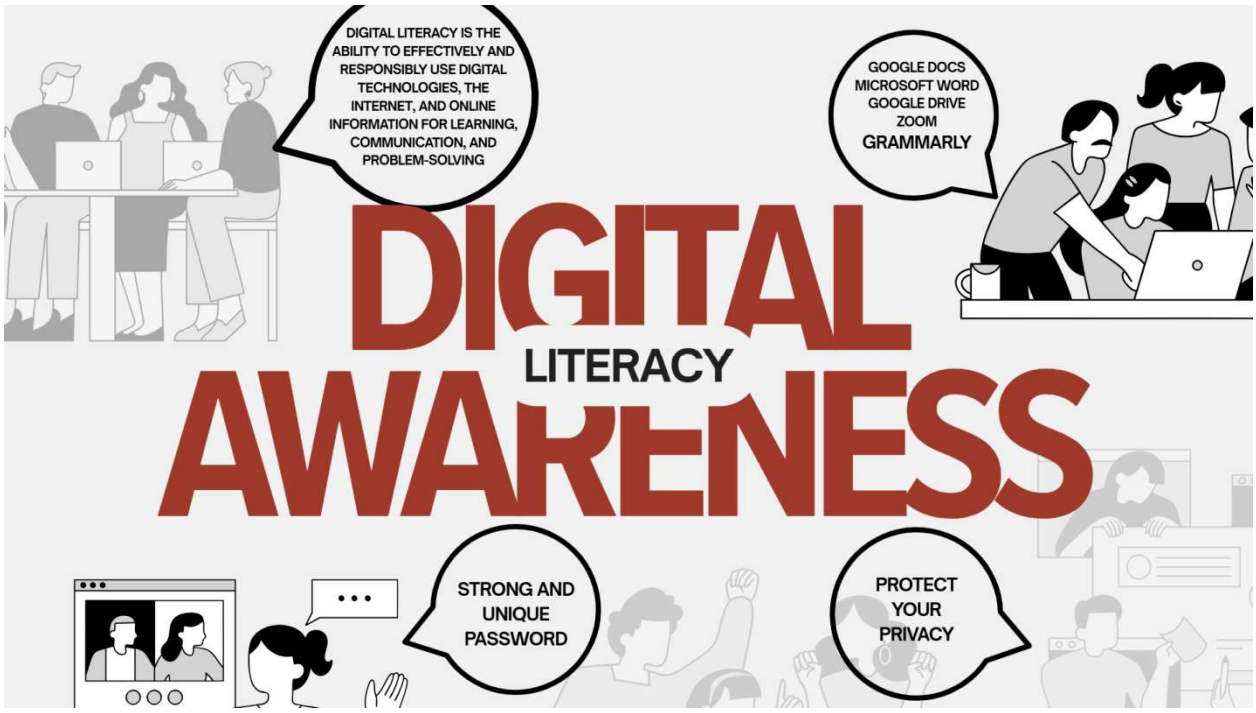
I created my infographic using Canva, as it is beginner-friendly and offers a wide range of templates and design elements. My visual slide covers three key topics: digital literacy, safe internet practices, and digital tools used by students. In the digital literacy section, I highlighted the importance of evaluating online information and using digital tools responsibly. The safe internet practices section includes tips such as using strong passwords, avoiding suspicious links, and protecting personal information. For digitals tools used students I included tools like Microsoft word, grammarly etc .

The design uses icons, short bullet points, and contrasting colors to make the information easy to read and visually appealing. I focused on keeping the content concise so that it can be quickly understood by college students.

CHALLENGE FACED:

One challenge I faced was selecting the right layout to fit all the information without making the slide look crowded. However, I found it interesting to experiment with different templates and visual elements to improve clarity and presentation.

THE INFOGRAPHIC:



THIS IS HOW COMPLETED THE TASK 1

TASK 2: BUILD YOUR STUDENT DIGITAL PORTFOLIO

For this task, I created profiles on GitHub, LinkedIn, and Kaggle.

GitHub is mainly used for hosting and managing code, collaborating with other developers, and showcasing technical projects. I created a profile README repository to introduce myself, including my name, branch, academic year, and my learning goals, which will help me build a strong coding portfolio.

LinkedIn is a professional networking platform where I added my Education details, including my degree, institution, and expected graduation year. It will help me connect with professionals and explore career opportunities.

I also created an account on Kaggle which is a platform focused on data science and machine learning, where users can work on datasets, participate in competitions, and improve analytical skills.

Over the next four years, I plan to use GitHub to upload projects and collaborate on open-source work, LinkedIn to build a strong professional network, and Kaggle to practice data analysis and machine learning.

These platforms will support my technical growth and career development.

GitHub profile:

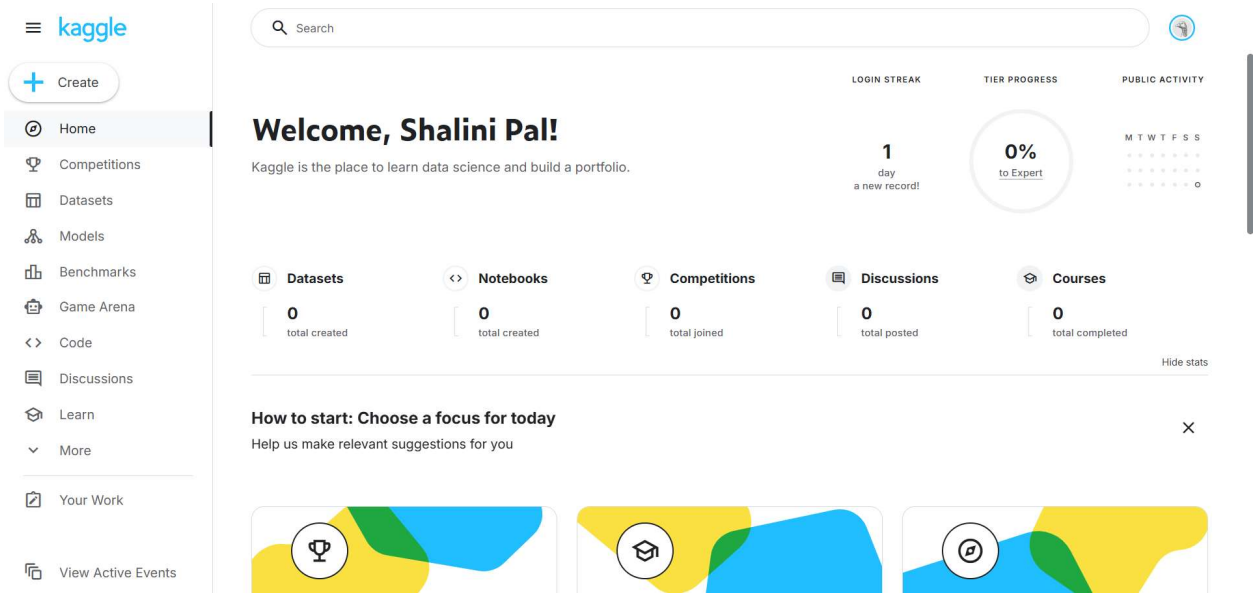
Kaggle profile:

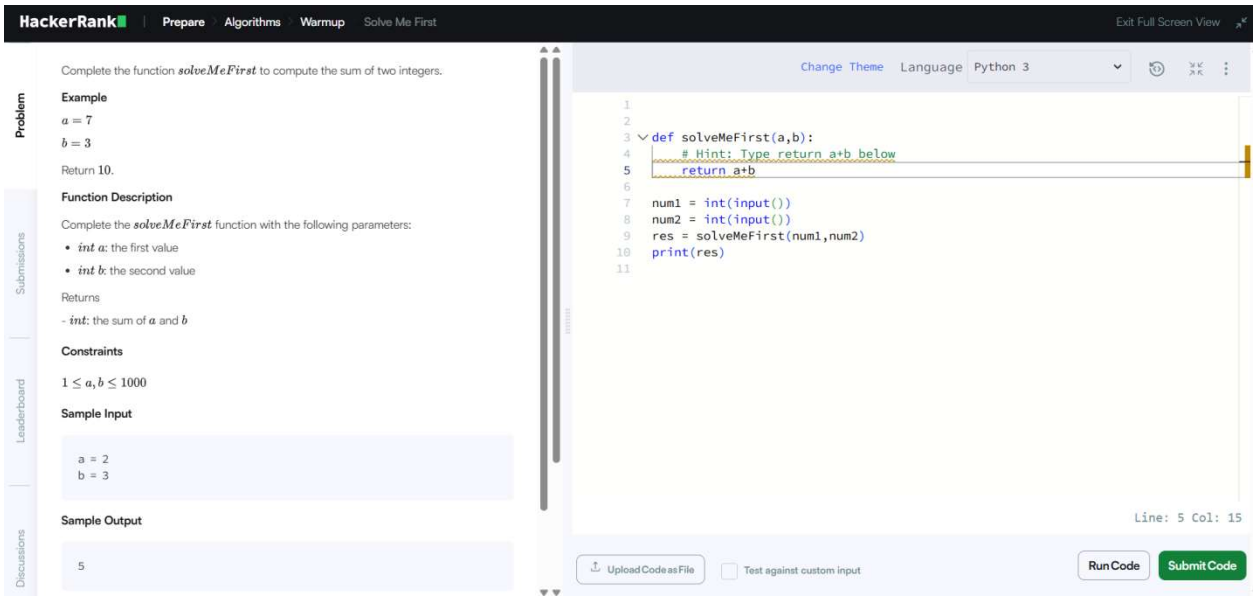


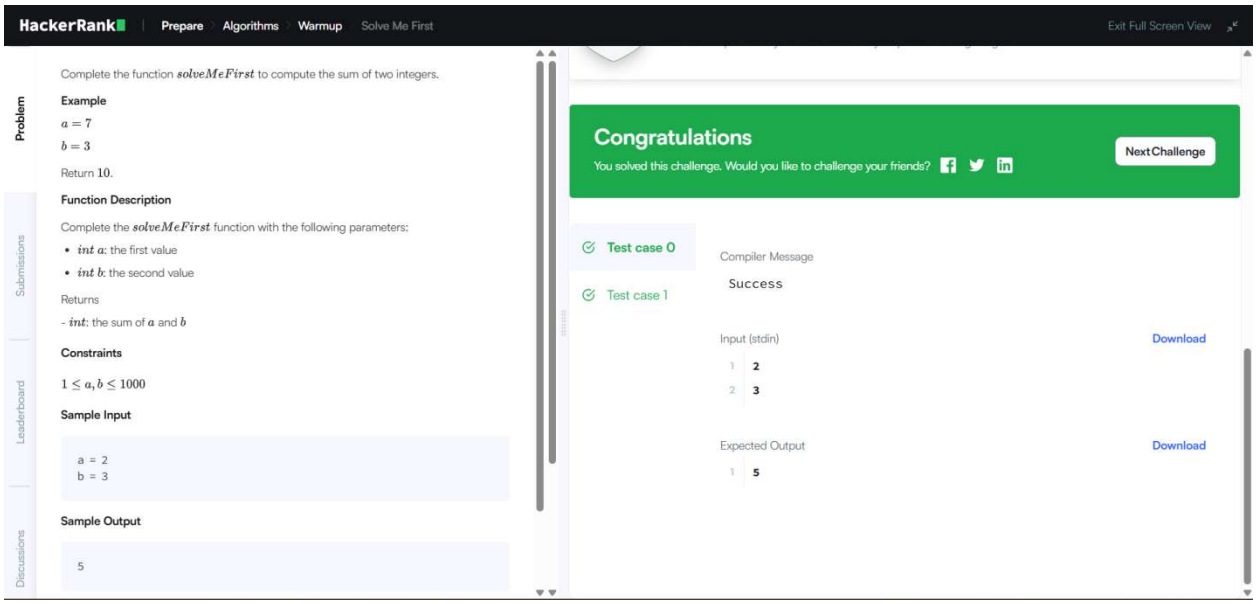
THIS IS HOW I COMPLETED THE TASK 2

TASK 3: EXPLORE CODING AND COLLABORATION PLATFORMS

PART A: CODING PRACTICE

I created an account on hackerrank and took an assessment named “SOLVE ME FIRST” and I successfully completed the assessment





THIS IS HOW I COMPLETED THE PART A OF TASK 3

PART B: GOOGLE WORKSPACE COLLABORATION

For this task, I used Google Forms and Google Sheets to create a Digital Literacy Awareness Quiz. Google Forms allowed me to design a quiz with five questions, including multiple-choice and short-answer types, which helped me understand how to collect structured responses efficiently. I also explored features like required questions and automatic response collection.

The responses from the quiz were automatically stored and organized in Google Sheets, where I could view and analyze the data in a tabular format. This helped me learn basic data handling and visualization concepts.

HOW THESE TOOLS WILL HELP ME ACADEMICALLY?

Through this activity, I practiced creating online surveys, managing data, and sharing digital content through links. These tools will be very helpful in my academic journey, as I can use them for conducting surveys, collecting project data, and organizing information. In the future, I plan to use Google Forms for feedback collection and

quizzes, and Google Sheets for data analysis and project work, improving both my productivity and digital skills.

THE GOOGLE FORM:

1. How do you evaluate the credibility of information found online? *

- ( ) Check multiple sources before trusting
- (•) Trust well-known websites only
- ( ) Rely on social media shares
- ( ) Do not verify information

2. How well do you understand permissions requested by mobile apps? *

- (•) Fully understand and control them
- ( ) Partially understand
- ( ) Usually ignore
- ( ) Do not understand at all

3. How do you decide which apps to install on your device? *

- (•) Check reviews, ratings, and permissions
- ( ) Install popular apps only
- ( ) Install based on recommendations
- ( ) Install without checking

TASK 4: DRAFT A PROFESSIONAL EMAIL AND ETTIQUETE GUIDE

PART A: WRITE TWO PROFESSIONAL EMAILS

I Wrote two emails, one to my faculty requesting to extend the deadline for submission of an assignment and the other email to a company coordinator regarding a summer internship.

While writing the email I used formal language and a calm and formal tone.

EMAIL 1:

EMAIL 1 :

TO: faculty@vitbhopal.ac.in

FROM: shalini.25bhi10018@vitbhopal.ac.in

Subject: Request for Extension on Assignment Submission

Dear Professor,

I hope you are doing well.

I am writing to respectfully request an extension on the submission deadline for the [Tutorial 1], which is currently due on 29.08.26, Due to serious health issues, I have been unable to complete the assignment to the best of my ability within the given timeframe.

I sincerely value the quality of my work and would greatly appreciate a short extension of 2 more days, to ensure that I can submit a well-prepared assignment.

I understand the importance of deadlines and apologize for any inconvenience this request may cause. Thank you very much for your time and consideration. I will make sure to submit the assignment promptly within the extended period if granted.

Yours sincerely,

Shalini Pal

EMAIL 2:

EMAIL-2:

TO: companycoordinator@comapany.in

FROM: shalini.25bhi10018@vitbhopal.ac.in

Subject: Application for Summer Internship Opportunity

Respected Sir,

I hope this message finds you well.

I am writing to express my interest in a summer internship opportunity at your esteemed organization. I am currently a student pursuing BTech degree in Computer science at VIT university, and I am eager to gain practical experience and enhance my skills in a professional environment.

I am particularly interested in your company because of its reputation for excellence in the industry and various impactful projects. I believe that an internship with your organization would provide me with valuable exposure and an opportunity to contribute meaningfully while learning from experienced professionals.

I have developed lot of coding skills and I am highly motivated to apply my knowledge in real-world situations. I am a quick learner and committed to delivering quality work.

I have attached my resume for your review. I would be grateful for the opportunity to discuss how I can contribute to your team during the summer internship period.

Thank you for your time and consideration. I look forward to your response.

Yours sincerely,
Shalini Pal

PART B: CREATE A SOCIAL MEDIA DO'S AND DON'TS CHECKLIST

A common situation where poor digital communication caused problems occurred in a college group project. One student sent a very brief and unclear message in the team chat, asking, "Who's doing the report?" without any context or tone. Some team members misunderstood the message as rude or demanding, which created tension and delayed the project. This shows how text-based communication can easily lead to misinterpretation when tone and clarity are missing.

The situation could have been handled differently by writing a clear and polite message, such as, "Hi team, could we decide who will work on the report section? Please share your preferences." Adding context, using courteous language, and checking the message before sending could have prevented confusion. This example highlights the importance of careful digital communication to maintain positive teamwork and avoid unnecessary conflicts in academic or professional settings.

TASK 5: CYBERCRIME AWARENESS CASE STUDY AND PREVENTION CHECKLIST

PART A: CASE STUDY

I Wrote a case study on UPI SCAM via investment and discussed about one real life situation which happened in India with a person. This was published in The Times of India.

PART B: PREVENTION CHECKLIST

While researching online safety for college students, what surprised me most was how frequently students fall victim to financial scams and phishing attacks, often through seemingly harmless messages or links. I learned that even simple actions, like sharing OTPs, using weak passwords, or trusting unknown websites, can lead to serious

consequences such as identity theft or financial loss. It was eye-opening to realize that cyber threats are not only technical but also rely heavily on human mistakes, making awareness and vigilance just as important as security tools.

As a result, one habit I will personally change is enabling two-factor authentication (2FA) on all my important accounts and carefully verifying any online financial transactions before authorizing them. Additionally, I plan to be more mindful about clicking links or sharing personal information online. This habit will help me maintain safer digital practices throughout my college years.

CONCLUSION:

In conclusion, digital literacy is more than just using technology—it is about understanding how to communicate, create, and navigate the digital world safely and responsibly. By being aware of online risks, practicing secure habits, and using digital platforms effectively, we can protect our personal information, improve academic and professional productivity, and build a positive online presence. As students, developing strong digital skills now will not only help us in our studies but also prepare us for future careers in an increasingly connected world. Remember, responsible digital behavior, critical thinking, and continuous learning are the keys to becoming digitally empowered and safe online.

THANK

YOU
